### NOTICE OF TEMPORARY URGENCY CHANGE PETITION EL DORADO IRRIGATION DISTRICT WASTEWATER CHANGE PETITION WW0020 AND ORDER WR-95-9 CHANGE IN WASTEWATER DISCHARGE INTO DEER CREEK EL DORADO COUNTY

On May 8, 2015, El Dorado Irrigation District (EID) filed a Temporary Urgency Change Petition (TUCP) with the State Water Resources Control Board (State Water Board), Division of Water Rights (Division) pursuant to California Water Code section 1435, et seq.

The requested change would temporarily reduce minimum treated wastewater discharges from Deer Creek Wastewater Treatment Plant (WWTP) into Deer Creek as required pursuant to the terms of the Order approving WW0020, as amended by Order WR-95-9. Pursuant to Order WR-95-9, minimum treated wastewater discharge requirements vary from 0.5 to 1.0 million gallons per day (mgd) depending on the daily influent flows into the Deer Creek WWTP. EID also recycles its treated wastewater effluent to use for irrigation of lawns and golf courses within its service area. Because the demand for recycled water is so large, EID has been supplementing its recycled water system with potable water, which would otherwise have been used for indoor consumptive use. EID requests approval to reduce its effluent discharge to Deer Creek to 0.32 mgd in order that EID be able to maximize its use of recycled water in its irrigation system, which will allow EID to preserve its potable water supply for indoor uses.

EID's TUCP, the Order approving the TUCP, Order WR-95-9, and related project information can be viewed at:

Pursuant to California Water Code section 1438(d), any interested person may file an objection to the TUCP. The procedure for addressing an objection is described in Water Code section 1438. Objections filed in response to this notice should be submitted to the persons listed below and must be received by 4:30 p.m. on **August 17, 2015**.
